■ Objectives:

- Identify common cardiac lesions presenting in infancy and learn how to recognize concerning signs and symptoms
- Recognize lesions requiring treatment and those that need follow up
- Use current requirements for screening
- Review common diagnoses made prenatally and learn how we plan for post op management
- Use concepts to safely increase access to care utilizing telemedicine
- Identify the challenges involved with the practice of healthcare via telemedicine
- Identify underlying symptom characteristics that may contribute to disruptive behavior
- Provide meaningful improvements to their care coordination for youth with developmental disabilities as they transition towards adulthood
- Use concepts to create a diagnostic plan for patients presenting with heavy menstrual bleeding
- Summarize the role of multi-disciplinary care in treatment of craniofacial anomalies
- Differentiate hemangiomas that can be followed in the office and those that need to be referred
- Diagnose a phytophoto dematitis

■ Statement of Planner/Speaker Disclosures:
